

Keanu Sida

Full Stack Developer

keanu.sida@gmail.com | github.com/keanu-sida | linkedin.com/in/keanu-sida

Founder of PathTree. AI-forward full-stack developer building products with TypeScript, Node.js, and LLM tooling.

Experience

Founder

2025 - Present

PathTree

Building pathtree.app — an interactive platform that maps career paths, tracks skill growth, and guides next steps with an in-app agent.

- Shipped a 3D helix home, career-tree explorer, study feed, and orchard progress map
- Built a Node.js/Express API with SQLite, auth, and live labor-market data
- Designed WebGL visualization with Three.js and Pixi.js

Full Stack Developer

2023 - Present

Freelance

Developed full-stack web applications using React.js, Node.js, and PostgreSQL. Implemented responsive designs and RESTful APIs.

- Built 10+ client projects
- Achieved 100% client satisfaction

Geospatial Analyst Intern

2023 - 2024

MapLabs, Inc.

Supported geospatial analysis and mapping projects; cleaned, joined, and visualized spatial datasets using Python/GeoPandas, QGIS/ArcGIS Pro, and PostGIS.

- Processed and joined spatial datasets (Shapefile, GeoJSON, CSV) with GeoPandas and PostGIS
- Built reproducible map production workflows in QGIS/ArcGIS Pro for analysis and reporting
- Implemented geocoding and reverse geocoding workflows to standardize address data
- Published interactive web maps (Leaflet/Mapbox) with clustering and heatmap layers

Assistant Club Manager

Aug 2022 - Sep 2023

Freedom Boat Club

Managed operations for a high-asset marina franchise during corporate integration and growth phase.

- Oversaw >\$3M in assets; contributed to >300% growth
- Led software integration post acquisition to streamline franchise operations

Dock Master

Oct 2019 - Aug 2022

Freedom Boat Club

Ensured safe, efficient daily marina operations and member experience at scale.

- Drove member satisfaction and retention through exceptional service
- Generated qualified leads for membership growth
- Maneuvered and maintained watercraft valued \$20K–\$80K while enforcing safety protocols

Research Specialist

Feb 2021 - Sep 2021

Medical University of South Carolina (MUSC)

Supported the Mulholland Lab with experiment scheduling, wet lab and bioinformatics analysis, and animal care.

- Managed lab operations and ensured adherence to research protocols
- Performed chemical and bioinformatics analyses; contributed to publications

Data Scientist (Founder)

Jan 2018 - Dec 2019

The Open Genome Initiative

Founded a nonprofit to expand access to genomic testing and reporting in underserved communities.

- Delivered free monogenic testing using Illumina chips
- Built custom R reports for results visualization and interpretation
- Increased access to genomic testing in the Columbia, SC area

Sous Chef

Jan 2019 - Sep 2019

Patrick Properties Hospitality Group (Parcel 32)

Contributed to culinary program execution and menu development in a high standard kitchen.

- Collaborated with James Beard–nominated chef on low country cuisine
- Blended traditional and modern techniques for elevated presentation

Administrative Assistant

Jul 2018 - Dec 2018

HarborMaster, Inc.

Supported operations for a marine maintenance firm handling electrical and plumbing work on large vessels.

- Managed scheduling, accounting, and lead processing
- Streamlined owner–technician communication for faster completion
- Implemented tooling (e.g., QuickBooks, Jira) to improve data accuracy

Line Cook

Feb 2018 - Jul 2018

Home Team BBQ

Executed line service and contributed to menu improvements in a high volume kitchen.

- Maintained quality and timing during peak service
- Helped create new menu items and trained new staff

Line Cook

Jun 2015 - Aug 2017

Kiawah Island Golf Resort

Prepared low country cuisine to Forbes 5 star standards across restaurants in The Sanctuary Hotel.

- Advanced from dishwasher to line cook in indoor and outdoor kitchens
- Upheld five star hospitality and plating standards

Transportation Specialist

May 2014 - Aug 2014

BMW Manufacturing Co., LLC

Wrapped newly assembled vehicles for transport and delivered them to post processing facilities.

- Improved process leading to factory wide 'Catch of the Day' award
- Set a shift record for most vehicles processed

Education

B.S. in Biochemistry and Molecular Biology

Dec 2020

University of South Carolina

Concentration in genomics; relevant coursework in data analysis, statistics, and laboratory techniques.

Certifications

Full Stack Engineering

Codecademy • 2023

Comprehensive program covering frontend, backend, and database technologies.

Data Science and Machine Learning

MIT Schwarzman College of Computing • 2022

Coursework in machine learning, data analysis, and applied AI methods.

Software Engineering Bootcamp

TripleTen • Dec 2025

Intensive, project-based program focused on practical full stack development, algorithms, and system design.
